Table of Contents Volume 177, 1989

Number 1

M.H. Walter: The induction of phenylpropanoid biosynthetic enzymes by ultraviolet light or fungal elicitor in cultured parsley cells is overriden by a heat-shock treatment 1

E. Komor, B.H. Cho, S. Schricker, C. Schobert: Charge and acidity compensation during proton-sugar symport in *Chlorella*: The H^+-ATPase does not fully compensate for the sugar-coupled proton influx 9

M. Wrischer: Ultrastructural localization of photosynthetic activity in thylakoids during chloroplast development in maize 18

R.F. Evert, R.J. Mierzwa: The cell wall-plasmalemma interface in sieve tubes of barley 24

H. Nonami, E.D. Schulze: Cell water potential, osmotic potential, and turgor in the epidermis and mesophyll of transpiring leaves. Combined measurements with the cell pressure probe and nanoliter osmometer 35

J.W. La Claire II: Actin cytoskeleton in intact and wounded coenocytic green algae 47

H. Habereder, G. Schröder, J. Ebel: Rapid induction of phenylalanine ammonia-lyase and chalcone synthase mRNAs during fungus infection of soybean (*Glycine max* L.) roots or elicitor treatment of soybean cell cultures at the onset of phytoalexin synthesis 58

K.S. Gould, E.M. Lord: A kinematic analysis of tepal growth in *Lilium longiflorum* 66

C. Schuster, S. Schmidt, H. Mohr: Effect of nitrate, ammonium, light and a plastidic factor on the appearance of multiple forms of nitrate reductase in mustard (*Sinapis alba* L.) cotyledons 74

G. Cornic, J.-L. Le Gouallec, J.M. Briantais, M. Hodges: Effect of dehydration and high light on photosynthesis of two C_3 plants (*Phaseolus vulgaris* L. and *Elatostema repens* (Lour.) Hall f.) 84

W.W Adams III, K. Winter, A. Lanzl: Light and the maintenance of photosynthetic competence in leaves of *Populus balsamifera* L. during short-term exposures to high concentrations of sulfur dioxide 91

T. Hartmann, A. Ehmke, U. Eilert, K. von Borstel, C. Theuring: Sites of synthesis, translocation and accumulation of pyrrolizidine alkaloid N-oxides in *Senecio vulgaris* L. 98

K. Albone, P. Gaskin, J. MacMillan, V.A. Smith, J. Weir: Enzymes from seeds of *Phaseolus vulgaris* L.: Hydroxylation of gibberellins A_{20} and A_1 and 2,3-dehydrogenation of gibberellin A_{20} 108

J.L. Walker, S.C. Huber: Regulation of sucrose-phosphate-synthase activity in spinach leaves by protein level and covalent modification 116

D.J. Cosgrove: Characterization of long-term extension of isolated cell walls from growing cucumber hypocotyls 121

M.A. Hajibagheri, T.J. Flowers: X-ray microanalysis of ion distribution within root cortical cells of the halophyte *Suaeda maritima* (L.) Dum. (Short communication) 131

Number 2

S.A.J. Zaat, A.A.N. Van Brussel, T. Tak, B.J.J. Lugtenberg, J.W. Kijne: The ethylene-inhibitor aminoethoxyvinylglycine restores normal nodulation by *Rhizobium leguminosarum* biovar. *viciae* on *Vicia sativa* subsp. *nigra* by suppressing the 'Thick and short roots' phenotype 141

J. Brangeon, A. Nato, A. Forchioni: Ultrastructural detection of ribulose-1,5-bisphosphate carboxylase protein and its subunit mRNAs in wild-type and holoenzyme-deficient *Nicotiana* using immunogold and in-situ hybridization techniques 151

M. Steffens, F. Ettl, D. Kranz, H. Kindl: Vanadate mimics effects of fungal cell wall in eliciting gene activation in plant cell cultures 160

F. Grolig, G. Wagner: Characterization of the isolated calcium-binding vesicles from the green alga *Mougeotia scalaris*, and their relevance to chloroplast movement 169

P.M. Schildwacht: Is a decreased water potential after withholding oxygen to roots the cause of the decline of leaf-elongation rates in *Zea mays* L. and *Phaseolus vulgaris* L.? 178

T. Caspar, B.G. Pickard: Gravitropism in a starchless mutant of *Arabidopsis*. Implications for the starch-statolith theory of gravity sensing 185

J.Z. Kiss, R. Hertel, F.D. Sack: Amyloplasts are necessary for full gravitropic sensitivity in roots of *Arabidopsis thaliana* 198

S.P Long, P.K. Farage, H.R. Bolhár-Nordenkampf, U. Rohrhofer: Separating the contribution of the upper and lower mesophyll to photosynthesis in *Zea mays* L. leaves 207

K.B. Schwab, U. Schreiber, U. Heber: Response of photosynthesis and respiration of resurrection plants to desiccation and rehydration 217

S. Ohl, K. Hahlbrock, E. Schäfer: A stable blue-light-derived signal modulates ultraviolet-light-induced activation of the chalcone-synthase gene in cultured parsley cells 228

K.M. Wright, K.J. Oparka: Sucrose uptake and partitioning in discs derived from source versus sink potato tubers 237

R.J. Cyr, B.A. Palevitz: Microtubule-binding proteins from carrot. I. Initial characterization and microtubule bundling 245

J.E. Dancer, T. ap Rees: Phosphoribosyl pyrophosphate and the measurement of inorganic pyrophosphate in plant tissues 261

P.I. Hilditch, H. Thomas, B.J. Thomas, L.J. Rogers: Leaf senescence in a non-yellowing mutant of *Festuca pratensis*: Proteins of photosystem II 265

H. Quader, A. Hofmann, E. Schnepf: Reorganization of the endoplasmic reticulum in epidermal cells of onion bulb scales after cold stress: Involvement of cytoskeletal elements 273

Number 3

E. Steudle, J. Frensch: Osmotic responses of maize roots. Water and solute relations 281

W. Hensel: Tissue slices from living root caps as a model system in which to study cytodifferentiation of polar cells 296

M. Lützelschwab, H. Asard, U. Ingold, R. Hertel: Heterogeneity of auxin-accumulating membrane vesicles from *Cucurbita* and *Zea*: a possible reflection of cell polarity 304

I. Nijs, I. Impens, T. Behaeghe: Leaf and canopy responses of *Lolium perenne* to long-term elevated atmospheric carbon-dioxide concentration 312

M.A. Belozersky, S.T. Sarbakanova, Y.E. Dunaevsky: Aspartic proteinase from wheat seeds: isolation, properties and action on gliadin 321

J. Kallarackal, G. Orlich, C. Schobert, E. Komor: Sucrose transport into the phloem of *Ricinus communis* L. seedlings as measured by the analysis of sieve-tube sap 327

J. Kallarackal, E. Komor: Transport of hexoses by the phloem of *Ricinus communis* L. seedlings 336

C. Schobert, E. Komor: The differential transport of amino acids into the phloem of *Ricinus communis* L. seedlings as shown by the analysis of sieve-tube sap 342

A. Laisk, V. Oja, O. Kiirats, K. Raschke, U. Heber: The state of the photosynthetic apparatus in leaves as analyzed by rapid gas exchange and optical methods: the pH of the chloroplast stroma and activation of enzymes in vivo 350

C.G. Bowsher, D.P. Hucklesby, M.J. Emes: Nitrite reduction and carbohydrate metabolism in plastids purified from roots of *Pisum sativum* L. 359

W. Gsell, O. Kiirats, W. Hartung, U. Heber: Inhibition of photosynthesis of sunflower leaves by an endogenous solute and interdependence of different photosynthetic reactions 367

B. Demmig-Adams, W.W. Adams III, K. Winter, A. Meyer, U. Schreiber, J.S. Pereira, A. Krüger, F.C. Czygan, O.L. Lange: Photochemical efficiency of photosystem II, photon yield of O_2 evolution, photosynthetic capacity, and carotenoid composition during the midday depression of net CO_2 uptake in *Arbutus unedo* growing in Portugal 377

M. de Agazio, R. Federico, S. Grego: Involvement of polyamines in the inhibiting effect of injury caused by cutting on K^+ uptake through the plasma membrane 388

J. Soll, V. Berger, J. Bennett: Adenylate effects on protein phosphorylation in the interenvelope lumen of pea chloroplasts 393

C.M. Anderson, M.B. Wilkins: Control of the circadian rhythm of carbon dioxide assimilation in *Bryophyllum* leaves by exposure to darkness and high carbon dioxide concentrations 401

S. Somersalo, G.H. Krause: Photoinhibition at chilling temperature. Fluorescence characteristics of unhardened and cold-acclimated spinach leaves 409

J. Springer, K.P. Heise: Comparison of acetate- and pyruvate-dependent fatty-acid synthesis by spinach chloroplasts 417

Number 4

V. Vreeland, W.M. Laetsch: Identification of associating carbohydrate sequences with labelled oligosaccharides. Localization of alginate-gelling subunits in cells walls of a brown alga 423

V. Vreeland, S.R. Morse, R.H. Robichaux, K.L. Miller, S.S.T. Hua, W.M. Laetsch: Pectate distribution and esterification in *Dubautia* leaves and soybean nodules, studied with a fluorescent hybridization probe 435

P. Spanu, T. Boller, A. Ludwig, A. Wiemken, A. Faccio, P. Bonfante-Fasolo: Chitinase in roots of mycorrhizal *Allium porrum*: Regulation and localization 447

C.M. Anderson, M.B. Wilkins: Period and phase control by temperature in the circadian rhythm of carbon dioxide fixation in illuminated leaves of *Bryophyllum fedtschenkoi* 456

M.R. Ward, H.D. Grimes, R.C. Huffaker: Latent nitrate reductase activity is associated with the plasma membrane of corn roots 470

T.G. Brock, R.E. Cleland: Role of acid efflux during growth promotion of primary leaves of *Phaseolus vulgaris* L. by hormones and light 476

R.D. Guy, J.A. Berry, M.L. Fogel, T.C. Hoering: Differential fractionation of oxygen isotopes by cyanide-resistant and cyanide-sensitive respiration in plants 483

P. Fourcroy, D. Klein-Eude, F. Guidet: Temporal control of phytochrome-dependent gene expression during radish seedling development 492

A. Parsons, D. Sanders: Electrical properties of soybean plasma membrane measured in heterotrophic suspension callus 499

H.A.W. Schneider-Poetsch, B. Braun, W. Rüdiger: Phytochrome – all regions marked by a set of monoclonal antibodies reflect conformational changes 511

S. Blechschmidt-Schneider, P. Ferrar, C.B. Osmond: Control of photosynthesis by the carbohydrate level in leaves of the C_4 plant *Amaranthus edulis* L. 515

S. Schmidt, H. Mohr: Regulation of the appearance of glutamine synthetase in mustard (*Sinapis alba* L.) cotyledons by light, nitrate and ammonium 526

P. Quick, G. Siegl, E. Neuhaus, R. Feil, M. Stitt: Short-term water stress leads to a stimulation of sucrose synthesis by activating sucrose-phosphate synthase 535

A. Palit, P. Galland, E.D. Lipson: High- and low-intensity photosystems in *Phycomyces* phototropism: Effects of mutations in genes *madA*, *madB*, and *madC* 547

Indexed in *Current Contents*
